

Spheroidally agglomerated basic cobalt(II) carbonate and spheroidally agglomerated cobalt(II) hydroxide, a process for producing them and their use

ABSTRACT

The present invention relates to basic cobalt(II) carbonate, agglomerated from fine primary particles and of general composition  $\text{Co}[(\text{OH})_2]_a[\text{CO}_3]_{1-a}$ , where  $0.1 \leq a \leq 0.9$ , and to spheroidal cobalt(II) hydroxide, to a process for producing them and to their use.
